Press Release 12/5/14

Lone Star moves into new manufacturing space.

17,800 s.f. facility located on three acres includes 15 ton lift capacity, fabrication area, and ample power to start operations. Located at 1100 Louisiana Street, City of South Houston, 77587. Previous tenant was a compressor manufacturer and both facility and existing plant equipment were acquired.

“We are fortunate to find a facility already suited to our needs and does not require much modification. With the previous company already operating a compressor repair and packaging facility our acquisition of both the building and plant equipment was very fortuitous. Even the former name of this company was Lone Star!” - Andrew Balberg - President & CEO Lone Star.

Construction and remodeling will begin at once with operations expected to begin in January 2015

Lone Star is a Manufacturer, Master Distributor, Packager, and Service company for blower and blower control systems. Plant will be located in the Houston Texas USA area and begin operations in January 2015. Initial products will include single stage turbo blowers (both gear driven and gearless), vertically split multistage turbo, and related blower control systems. Lone Star will service many other brand of blowers.

Industries served include Water and Wastewater, Power, Petro-Chemical, Oil and Gas, Mining, and many others using compressed air or gas, pressure or vacuum applications.

Lone Star is now looking for agents and distributors starting in the North and South American markets.
