Press Release 2/29/16

Lone Star will exhibit at the 2016 SWANA palooza in Charleston, SC April 4-7 in Booth 506.

Landfill Gas & Biogas Symposium is now combined with several other events including Landfill Methane Outreach Program at one event called SWANA palooza.

“We are excited to debut two new products at this show. Our Geared Turbo blower can reach pressures of 35 psig as well as a wide range of flow incorporating variable vane technology. This offers a unique alternative for the gas to energy projects not available anywhere else. Multistage Turbo will also showcase a higher pressure range than any other competitor of this well-known and tested technology” per Andrew Balberg – President Lone Star Blower. “We look forward to competing in this market with fast and immediate service combined with the best centrifugal technologies offered anywhere.”

The owners of Lone Star have been working with blowers and exhausters in the biogas market for more than 25 years and are very knowledgeable the demands needed for success in this market.

Lone Star is a Manufacturer, Master Distributor, Packager, and Service company for blower and blower control systems located in the Houston Texas USA. Products include single stage turbo blowers (both gear driven and gearless), vertically split multistage turbo, and related blower control systems. Lone Star also services many other brand blowers.

Industries served include Water and Wastewater, Power, Petro-Chemical, Oil and Gas Mining, and many others using compressed air or gas, pressure or vacuum applications.

Lone Star is now looking for agents and distributors starting in the North and South American markets.
